

Celebrating A Proud History

100 Years of Excellence

Greetings Friends,

This year, Faber Burner Company proudly celebrates a century of providing combustion solutions.

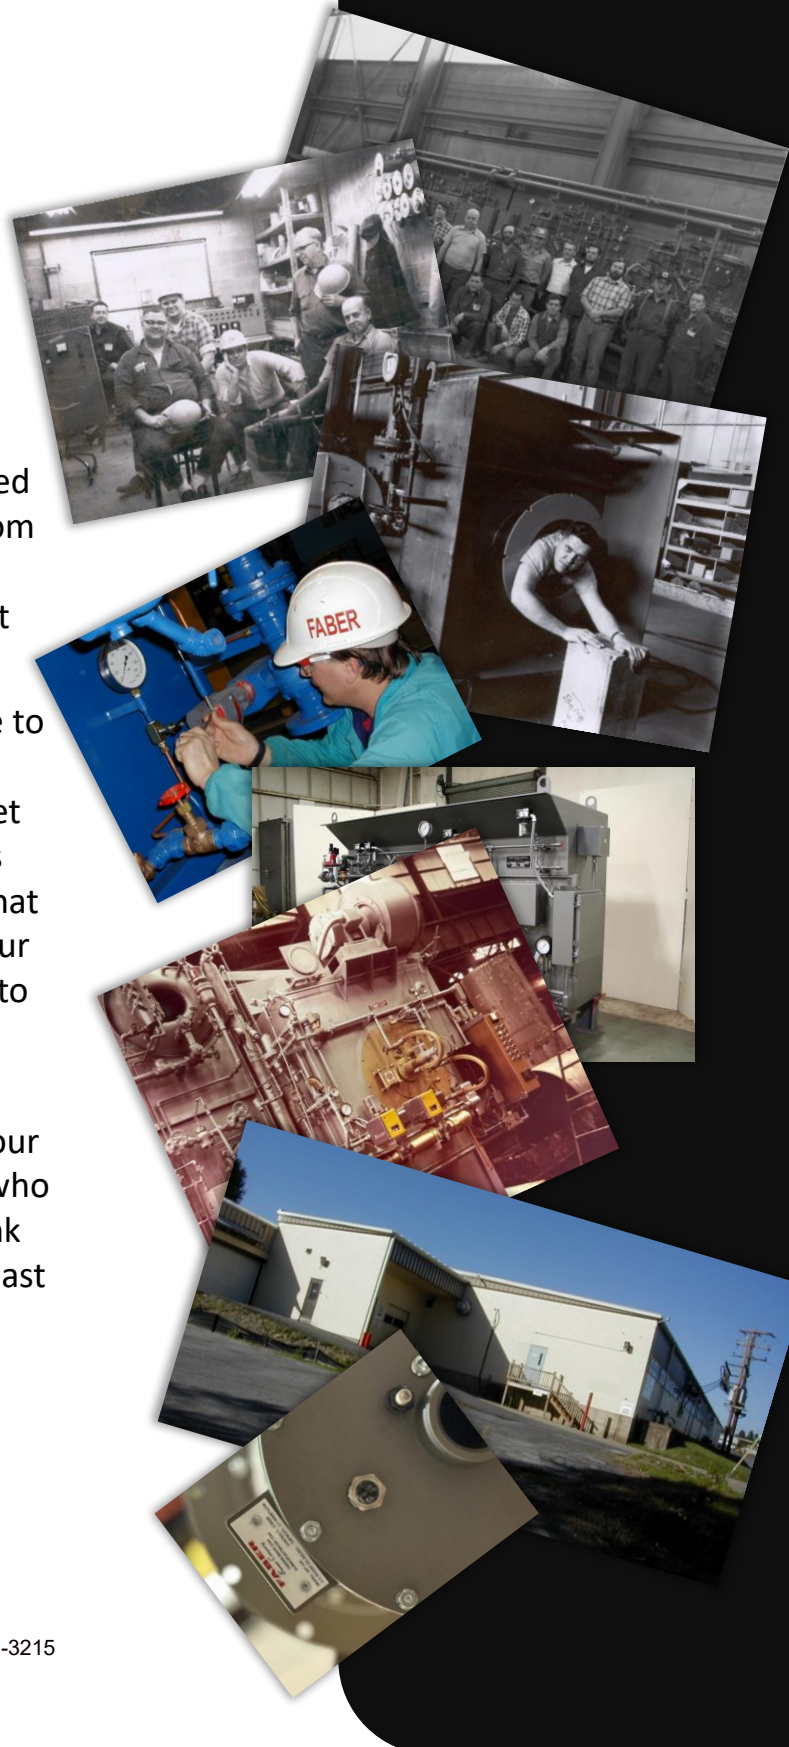

Since 1926, we have built our reputation on providing outstanding products that are user-friendly, well-built, and reliable. Faber's focus continues to be on helping our customers succeed by delivering exceptional service and results. From our earliest burner designs to today's advanced combustion systems, innovation has remained at the heart of everything we do.

As industries evolve, so does Faber. We continue to expand our product portfolio with new burner technologies and combustion solutions that meet changing performance, efficiency, and emissions requirements. At the same time, we recognize that many applications require a unique approach. Our engineering team works closely with customers to develop customized solutions tailored to their specific processes and operating needs.

We are very blessed and extremely grateful for our customers, employees, suppliers, and partners who have been part of our journey and success. Thank you for the trust, support, and loyalty over the past century.

We look forward to building the next 100 years together.

**Sincerely,
Team Faber**

Igniters and Pilots

Gas, Oil or High Energy Spark. Faber Burner Company has a complete line of igniters that provide safe and reliable light off. 20,000 Btu/hr to 20 MMBtu/hr.

Package Burners

The finest and most comprehensive combustion systems available for boilers, high temperature hot water generators, process furnaces and more.

Oil Guns

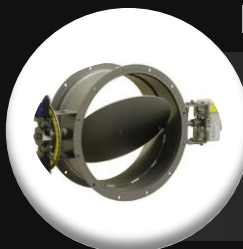

Atomizers with capacities from 2.1 to 200 MMBtu/hr. Firing conventional and alternative liquid fuels with either steam, air, or mechanical atomization.

Forefront Burners

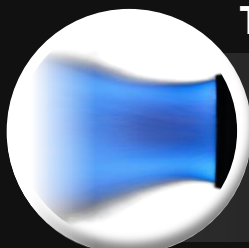

Heavy-duty and user-friendly gas burners for a vast array of applications that require heating capacities from 500,000 to 12,000,000 Btu/hr.

Dampers

Faber offers industrial dampers for high-temperature air or flue gas: Single & Multi-Blade. Standard sizes are always in stock.

Trinity Burners

The TMB family of leading-edge Ultra-Low NOx burners that efficiently delivers single-digit NOx performance.

Pipe Rack Assemblies

Faber's engineered piping systems are designed to safely and accurately control the pressure and flow of any liquid or gas including conventional and alternative fuels, steam, and air.

LXE Burners

Modular industrial burners with unparalleled flexibility and performance. Heat inputs range from 10 to 60 MMBtu/hr.

Control Systems

Faber supplies user-friendly comprehensive strategies for the optimal control of combustion equipment. From basic to custom-engineered state-of-the-art systems.

Specialty Burners

Specialty burners to meet application-specific fuel-burning needs. Some examples include start-up burners, air heating, biogas guns, and waste gas guns.

Spare Burner Parts

We support what we build. Faber maintains one of the most extensive inventories in the combustion industry. Thousand of items are ready for immediate shipment.
