

Fuel Oil Burning Equipment

FABER
Burner Company

To Everything There Is A Season:
Winter Is Oil Firing Season!

Every year around this time, Faber gets numerous calls from customers experiencing natural gas curtailment or preparing for it. This winter has been no exception.

Preparing an idle oil system can be challenging, even for an experienced operator and crew, especially if that system has been idle for years or perhaps decades. Doing this on short notice “when the gas company calls” is all the worse.

At Faber, we have the expertise and equipment you need in stock: Replacement oil guns, complete oil and atomizing systems, electric and pneumatic FM approved safety shutoff valves, safety switches, and regulators. We routinely assist customers firing oil, whether they use Faber burners or not. With over 100 years of experience Faber has the know-how, proven products, and the stock of parts to get you up and running on oil. And we do it quickly.

So, when you are considering industrial fuel burning equipment, pipe skids, or any of the many quality products Faber provides, assess your options and then give Faber a call to see the difference. You’ll speak with a knowledgeable professional right here in Lock Haven, Pennsylvania, where all our products are made.

How can we help you?

When you contact Faber, you will be working directly with people who will answer your questions, offer solutions, and provide results.

Package Burners

The finest and most comprehensive combustion systems available for boilers, high temperature hot water generators, process furnaces and more.

Forefront Burners

Heavy-duty and user-friendly industrial gas burners for a vast array of applications that require heating capacities from 500,000 to 8,000,000 Btu/hr.

Specialty Burners

Specialty burners to meet application-specific fuel-burning needs. Some examples include start-up burners, air heating, biogas guns, and waste gas guns.

LXE Burners

Modular industrial burners with unparalleled flexibility and performance. Heat inputs range from 10 to 60 MMBtu/hr.

Igniters and Pilots

Gas, Oil or High Energy Spark. Faber Burner Company has a complete line of igniters that provide safe and reliable light off. 20,000 Btu/hr to 20 MMBtu/hr.

Oil Guns

Atomizers with capacities from 2.1 to 200 MMBtu/hr. Firing conventional and alternative liquid fuels with either steam, air, or mechanical atomization.

Dampers

Faber offers industrial dampers for high-temperature air or flue gas: Single & Multi-Blade. Standard sizes are always in stock.

Control Systems

Faber supplies user-friendly comprehensive strategies for the optimal control of combustion equipment. From basic to custom-engineered state-of-the-art systems.

Pipe Rack Assemblies

Faber's engineered piping systems are designed to safely and accurately control the pressure and flow of any liquid or gas including conventional and alternative fuels, steam, and air.

Spare Burner Parts

We support what we build. Faber maintains one of the most extensive inventories in the combustion industry. Thousand of items are ready for immediate shipment.
